Hi Tom,

Not much going on. Getting ready for the second round of groundwater sampling at CFAC.

John Fuller (congressman Zinke's rep.) stopped by Tuesday, as he was coming to town for other items, to see how things were going and if we needed anything? I reminded him of the two projects going on and we were keeping each other in the loop and things seemed to be going along fine. John seemed to just want to check in.

As a side note:

I had a nice visit with the FVCC Phi Theta Kappa Honor Society students today. They are working on a project on Rights and Responsibilities and have picked C. Falls as their site. They asked some good questions and need to engage with different organizations. i.e. EPA, City, companies, community etc. They seem to be working on a similar level to our Community Involvement. When they asked "How can we help?" I thought it would be nice if they could research Superfund sites and provide the community with the positive side of Superfund. They seemed very interested in that idea. They may be holding some of their own interviews and maybe an open house at the college. They said they would share this with us in the future. I have provided them with my contact in case they have any further questions.

Other than that, fairly quiet on this end.

Mike
